

Change of Personnel

David Willemsen Becomes COO of Tion Renewables

David Willemsen is now COO of Tion Renewables. Photo credit: Sapna Richter.

Munich, April 1, 2025. As of today, David Willemsen takes over the newly created role of Chief Operating Officer (COO) of Tion Renewables Group (“Tion”). Willemsen, who has held the position of Chief Commercial Officer (CCO) since April 1, 2024, will henceforth be responsible for the business units “Performance Management”, comprising the company’s internal asset management and commercialization, as well as “IT and Data Management”. The industrial engineer has been working in the renewable energy sector since 2010.

As COO, the 38-year-old combines the tasks of internal asset management, the offtake of electricity from the company’s own plants (together: “Performance Management”), as well as IT and data management, and comments: “I would like to thank the Management Board for the trust placed in me. More than ever, my work is now aimed at leveraging every possible synergy to achieve maximum production volumes with our wind and solar plants, sell our green electricity at the best prices, and continue to digitize our internal processes day by day.”

Since entering the renewable energy sector 15 years ago, the industrial engineer, who specializes in electricity and flexibility trading, has remained loyal to the industry. After having started at RWE, he has inter alia worked for Trianel, E.ON, and most recently Pexapark, a Swiss software developer for commercialization, where he led the risk management team for almost three years from September 2021. A year ago, Willemsen finally joined Tion Renewables in the role of COO.

Ingmar Helmke, CEO of the company, adds: “David Willemsen made the energy transition his profession even before it was on everyone’s lips. He now not only contributes his extensive experience profitably to Tion but is also always available to his colleagues as a sparring partner and leads his team by example. We are therefore delighted that we could inspire David for our new role of COO.”

About Tion Renewables:

Tion Renewables empowers the energy transition.

Headquartered in Munich, Germany, the renewable energy power producer focuses on building and operating on-shore wind and on-shore solar farms as well as battery energy storage systems across Europe, generating clean energy every day.

The Group’s force emanates from a unique nexus of talent, dedication and long-term capital, coupled with long-term partnerships built on agility and trust.

Tion Renewables (“Tion”) had been listed in 2019, was delisted by the investment organization EQT Group (“EQT”) in 2024 again, and holds a major share in the independent power producer clearvise AG. Tion benefits from EQT’s deep experience in the renewable energy space, access to its network of over 600 industrial advisors, as well as its in-house expertise in commercial, sustainability and digitalization.
